SELECTIVE PALLET RACK

Description:

The Selective Pallet Rack is the most versatile and widely used racking system, designed for easy access to every pallet at any time. Its adjustable beam levels make it ideal for storing a wide range of goods with varying sizes and weights.

Features:

*Direct access to each pallet for maximum flexibility.
Adjustable beams to accommodate different pallet heights.
Easy to install, expand, or reconfigure.
Compatible with all standard forklift types.
Strong, durable construction for long-term performance.*

Applications:

Perfect for warehouses, distribution centers, and storage facilities that require fast pallet retrieval and high selectivity
